DETAILED OFFICE ACTION

The request filed on 17 June 2008 for a Continued Examination (RCE) under 37 CFR 1.114 based on parent Application No. 10/681,018 is acceptable, and a RCE has been established. An action on the RCE follows.

Applicant's amendment filed on 17 June 2008 is acknowledged and entered. Following the amendment, claims 23-35 and 42-44 are canceled, and the new claims 45-50 are added.

Currently, claims 45-50 are pending and under consideration.

Note, the status of claims 45-50 should be "New" as the claims filed in the amendment after final were not entered.

Withdrawal of Objections and Rejections:

All objections and rejections of claims 23-35 and 42-44 are moot as the applicant has canceled the claims.

New Matter Rejection

The following is a quotation of the first paragraph of 35 U.S.C. 112:

> The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 45-50 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The new independent claim 45 recite "A method for treating an autistic individual exhibiting a *lack of toilet training* and characterized by an abnormally *low fecal chymotrypsin* level …". Applicants have not pointed out, nor can the Examiner locate, the basis in the

specification for such a limitation. In the response filed on 17 June 2008, Applicants pointed out the support in the specification, on pages 22-26. However, this is insufficient to support the present claims because, while the specification teaches a method for treating an individual having an autistic disorder (in general) characterized by a lowered chymotrypsin level, it does not specifically teach a method for treating an autistic individual with the particular combination of characteristics of lack of toilet training and a lowered chymotrypsin level.

Further, the new claim 46 recites the limitation "approximately 4,000 to approximately 60,000 U.S.P. Units/tablet". Applicants have not specifically pointed out, nor can the Examiner locate, the basis in the specification for such a limitation.

This is a new matter rejection.

Rejections under 35 U.S.C. §112:

The following is a quotation of the second paragraph of 35 U.S.C. 112:

> The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 45-50 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 45 is indefinite for the recitation "effective amount of digestive enzymes" because it is unclear for what it is effective, and how "an *effective* amount" is determined. "An effective amount" on its face is indefinite since it fails to state the function which is to be rendered effective (*In re Frederiksen & Nielsen* (CCPA) 102 USPQ 35). Claim 49 is similarly indefinite.

The remaining claims are included in this rejection because they are dependent from the specifically mentioned claims without resolving the indefiniteness issue belonging thereto.

Conclusion:

No claim is allowed.
